## About Paras Chemicals

Established by Mr. Surendra Shah and Mr. Saurabh Shah, Paras Chemicals has grown as a reliable industrial chemical distribution firm with a strong focus on quality, supply consistency, and long-term business relationships. We work with trusted manufacturers and supply partners to support industrial customers with products used across manufacturing, treatment, cleaning, processing, formulation, and textile applications.

# Vision, Mission & Values

Our business is built around trust, dependable supply, and a quality-first approach to industrial chemical distribution.

## Vision

To be a trusted and reliable name in industrial chemical distribution, known for quality products, consistent supply, and long-term relationships with customers, manufacturers, and supply partners.

## Mission

To supply quality industrial chemicals to end users, manufacturers, processors, and businesses with reliability, transparency, timely coordination, and responsive service.

## Reliability

Consistent availability, timely coordination, and dependable supply for repeat industrial requirements.

## Quality

Known for quality products from trusted manufacturers in a market where material mixing and inconsistency are common concerns.

## Trust

Transparent communication, fair dealing, and long-term relationships with customers and suppliers.

## Customer Commitment

Understanding customer requirements and supporting them with practical, timely, and dependable service.

## Responsibility

Proper handling, coordination, and documentation support including COA and SDS / MSDS wherever applicable.

## Continuous Growth

Expanding product range, sourcing capabilities, and service standards to support evolving industrial needs.

## Why Choose Paras Chemicals

We combine product quality, dependable supply, and strong relationships to deliver practical solutions that support our customers' operations.

- ✓ Reliable & consistent supply for repeat industrial requirements.
- ✓ Known for quality in a market where material mixing and inconsistent supply are common concerns.
- ✓ Own transportation fleet for better control over dispatch and delivery coordination.
- ✓ Long-standing manufacturer and supply-partner relationships.
- ✓ Documentation support including COA, SDS / MSDS, packing details, and grade information wherever applicable.
